AirSpeed® MINI PAK'R® Industrial

Renew™ 200x130 HD

- Contains 30% Post-consumer recycled (PCR) content
- 100% recyclable
- Void fill

These AirSpeed Renew air bags are created out of 30% Post-consumer recycled content. We strive for a circular economy and this recycled content embodies this. It is made from products that served end-users, after which it has been recycled. It is sustainable and circular... the print included! This is printed on each air cushion with a water-based ink, so it's not harmful to the environment.

- Size cushion: WxL = 200x130 mm
- Thickness: 23 micron
- Material: HDPE
- Complies with EN13427 standard for packaging and packaging waste
- Product code: 4079843

Machine & Accessories

The **MINI PAK'R Industrial** is a compact and versatile machine producing air cushion on-demand. Compatible with Integrated Systems and a large range of accessories, the machine is the right solution for warehouses and distribution centers with multiple packing tables. Using RFID, the film settings are automatically selected, which make the machine easy to use.

AirSpeed® MINI PAK'R® Industrial

Renew™ Double Cushion

- Contains 30% Post-consumer recycled (PCR) content
- 100% recyclable
- Large void fill

These AirSpeed Renew air bags are created out of 30% Post-consumer recycled content. It is made from products that served end-users, after which it has been recycled. The Renew Double Cushion film is transparent, because the resins used in these films originate from very clean sources, such as waste from supermarkets. This allows us to create an – almost – transparent air cushion out of post-consumer waste. The information is printed on each air cushion with a water-based ink, so it's not harmful to the environment.

- Size cushion: WxL = 400x150 mm
- Thickness: 23 micron
- Material: LDPE
- Complies with EN13427 standard for packaging and packaging waste
- Product code: 4081753

Machine & Accessories

The **MINI PAK'R Industrial** is a compact and versatile machine producing air cushion on-demand. Compatible with Integrated Systems and a large range of accessories, the machine is the right solution for warehouses and distribution centers with multiple packing tables. Using RFID, the film settings are automatically selected, which make the machine easy to use.
