

Environmental Policy.

Pregis Ltd are one of the UK's premier specialists in high performance void fill packaging & paper packaging machines. We design and manufacture void fill packaging systems, supplier of converted paper consumable products and distributor of airbag film and machines.

We are always looking into ways to approach innovation to produce and manufacture more environmentally responsible products. This for us, as a global driver, will not only help to improve our environmental performance in our own operations but to do so by reducing costs and protecting the environment. Our core belief is that sustainability and innovation together will strengthen our organisation, ethically and universally, thus an opportunity for growth.

Being environmentally aware about the diminishing amount of natural resources, adapting to climate change and taking an effective approach to waste management are our global goals to reducing harm to the environment. Within the Pregis Ltd organisation and through a programme of continual improvement, these three factors can be achieved within our manufacturing operations, in the design and build of our products and in the volume of waste our products can be reduced down to once they are disposed of.

This policy will be the main driver towards Pregis Ltd contributing to a cleaner environment and provides the framework for setting & reviewing objectives & targets; and thus we commit to:-

- creating products that are designed to reduce the effect on the environment by being recycled, recyclable and biodegradable;
- fulfilling our compliance obligations;
- protection of the environment, including prevention of pollution and other specific commitment(s) relevant to the context of the organisation;
- adopting best practice energy saving initiatives in the workplace;
- reducing our waste through the adoption of the waste hierarchy;
- promoting environmental awareness among our employees and encourage them to work in an environmentally responsible manner;
- Specifying and purchasing sustainable, recycled and recyclable materials whenever possible.
- Communicating policy to all persons working for or on behalf of the organisation.

This policy will be reviewed on a regular basis to ensure it is compatible with the context and strategic direction of the Company.

Mark Kempster
Managing Director.
